

- Electrically or pneumatically actuated valves
- With internal or external pilot air
- Sturdy and reliable

Specified types in accordance with ATEX directive for potentially explosive atmospheres

→ [www.festo.com/en/ex](http://www.festo.com/en/ex)

# Solenoid/pneumatic valves, Tiger 2000

Key features

FESTO

## General information

- A complete and comprehensive range with 5/2- and 5/3-way valves
- Poppet valve for single solenoid functions or piston spool for more complex versions with air spring, and 5/3-way valves
- Optimised for increased flow rates without increasing size
- Tubing connection threads in sizes G $\frac{1}{8}$ , G $\frac{1}{4}$ , G $\frac{3}{8}$
- Diverse and flexible, side and front mounting
- Pneumatic or electrical actuation
- Versatile electrical connection with F or V solenoid coil with minimal power consumption, can also be used with valve terminals
- Functional and timeless design, enclosed front housing

## Solenoid coils

### F solenoid coils

Voltage:

- 12 to 230 V DC
- 12 to 240 V AC (50 to 60 Hz)

Power consumption:

- 4.5 W

- For all MFH valves
- Selected types conform to the ATEX directive for explosive atmospheres  
→ [www.festo.com](http://www.festo.com)

- Easily interchangeable solenoid coils
- Solenoid coil not included in scope of delivery

### V solenoid coils

Voltage:

- 24 V DC

Power consumption:

- 2.5 W

- For all MVH valves
- Minimal heat-up

- Solenoid coil included in scope of delivery

## Manifold mounting

### With PAL manifold strip

### With PRS manifold

The Tiger 2000 valves can be mounted on PAL manifold strips with common supply port or on PRS manifolds with common supply port and common exhausts. Manifold strips and manifolds have 2 to 10 valve positions.

# Solenoid/pneumatic valves, Tiger 2000

Key features

FESTO

## Valve terminals

Ready to connect, completely assembled type O2 valve terminal, available with Tiger 2000 valves (V solenoid).

Connection options:

- Central multi-pin plug
- Fieldbus interface for all common fieldbus protocols
- Autonomous with integrated controller (PLC)
- For G $\frac{1}{8}$  and G $\frac{1}{4}$

## Manual override for valves with V solenoid coil

Resetting (standard)

Press on the aluminium plate

## Conversion to detenting actuation

1 Pull out the aluminium plate

2 Using a screwdriver, simultaneously push and turn the exposed manual override

## Blocking the manual override

1 Pull out the aluminium plate

2 Rotate the aluminium plate by 180° and replace

3 The manual override is now blocked

## Pilot exhaust air for valves with V solenoid coil

- 1 The cap may not be turned when removing the seal
- 2 Seal installed

Free pilot exhaust air Unducted by removing the seal in the top cover, the 3 on the cap must always be aligned with valve port 84 or 82.

- 1 Seal removed

Technical data – 5/2-way valves

-  - Flow rate  
750 ... 2000 l/min

Wearing parts kits  
→ 52

General technical data			
Pneumatic connection	G1/8	G1/4	G3/8
Valve function	5/2-way, single pilot		
Constructional design	Poppet		Piston spool
Sealing principle	Soft		
Actuation type	Pneumatic		
Type of reset	Mechanical spring		
Type of pilot control	Direct		
Direction of flow	Non-reversible		Reversible
Exhaust function	With flow control		
Manual override	None		
Type of mounting	Via through-holes		
Mounting position	Any		
Nominal size [mm]	5	7	12
Standard nominal flow rate [l/min]	750	1300	2000
Grid dimension [mm]	27	33	41
Product weight [g]	170	240	570

Operating and environmental conditions			
Pneumatic connection	G1/8	G1/4	G1/4
Operating medium	Filtered compressed air, lubricated or unlubricated Vacuum		
Operating pressure [bar]	0 ... 10	0 ... 10	-0.9 ... +10
Pilot pressure [bar]	1.5 ... 10	1.5 ... 10	2 ... 10
Ambient temperature [°C]	-10 ... +60		
Temperature of medium [°C]	-10 ... +60
